

A photograph of Karl Popper, an elderly man with white hair, wearing a light blue short-sleeved shirt. He is sitting at a dark wooden table outdoors, leaning forward and writing on a white sheet of paper with a black marker. On the table in front of him are two white coffee cups on saucers and a black smartphone. The background shows a brick building with windows and some greenery.

Karl Popper and 21st Century Philosophy of Science

12 – 14
June
2024

Czech Academy of Sciences

Stephen Turner
University of South Florida

Jiji Zhang
Chinese University of Hong
Kong

Registration Fee
HK\$ 600

Karl Popper (1902-1994) is regarded as one of the most influential philosophers of science of the twentieth century. However, Popper's legacy on contemporary philosophy of science is surprisingly thin. This conference aims to revisit and explore Popper's legacy for twenty-first century philosophy of science.

- Featuring 15 talks by leading Popper scholars and philosophers of science from 11 countries across the globe

Contributed Speakers

Nimrod Bar-Am (Sapir College, Israel)
Brian Boyd (University of Auckland, New Zealand)
Rafe Champion (Independent, Australia)
Gal Gerson (University of Haifa, Israel)
Oscar L. González-Castán (Complutense University of Madrid, Spain)
Margaretha Hendrickx (Independent, USA)
Carlos Monteiro (University of Coimbra, Portugal)
Levi Smith (Western Michigan University, USA)
Constantin Stoenescu (University of Bucharest, Romania)
Kei Yoshida (Waseda University, Japan)

Hosted by Division of Humanities, The Hong Kong University of Science and Technology

Sponsored by the Karl Popper Charitable Trust
